Dear Hiring Manager,

I am writing to express my interest in joining your team as a Full Stack Engineer. I bring more than seven years of experience building scalable, high-performance web applications with TypeScript, React, and Node.js, along with over three years of hands-on work with AI-assisted development. I enjoy roles where solid engineering and real product impact go hand in hand.

Most recently at Form Factory, I built high-traffic, server-rendered web applications with React, Remix, and TypeScript for brands such as Chubbies. I owned features end-to-end, from technical design to deployment and monitoring, and focused on performance, SEO, accessibility, and stability in production. I also integrated a wide range of third-party services through REST and GraphQL APIs, keeping the applications fast and reliable as they grew.

My experience spans very different environments. At Fusion Specialty, I helped maintain frontend standards across multiple products, wrote automated tests with Jest and Testing Library, and contributed reusable components and Storybook documentation to the design system. At Dock, I architected the company's core platform on a microservices architecture, working across backend and frontend and mentoring junior developers. At IBM, I developed a dashboard used to monitor IBM machines globally and supported mission-critical enterprise systems. I also co-created io.insure, the first M&A marketplace for the insurance industry.

I have used ChatGPT, Cursor, and Claude in my daily workflow since their early days. For me, AI is a force multiplier: it helps me ship faster, refactor with confidence, write tests, and debug complex issues, while I stay responsible for architecture, code quality, and careful review of everything that goes to production. I would be glad to bring this approach to your team.

I am available to start immediately and am comfortable working remotely with distributed teams across time zones, as I have done with companies in the United States and Australia. Thank you for your time and consideration. I would welcome the opportunity to discuss how I can contribute to your team.

Sincerely,

Cesar Fonseca
